# 24X7

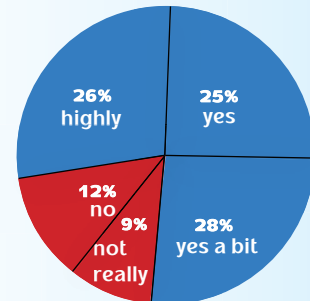

- Several synchronized video screens deliver a unique experience with the lecture content in an accurate way
- For immediate mass implementation, the viewer is exposed in standard browser with no installation
- Advanced search including visual catalog enables quick access to relevant part of a lecture
- Unique interactive learning environment with a set of functions such as two way dialog interaction (text, voice & video)
- Fully automatic production-store-share cycle

streamclass

Student reports high satisfaction and better achievements when using recorded lessons

High positioning for institutes providing advanced lecture capture tools

- From the lecture hall to the personal device in OneClick
- Lectures are automatically processed, recorded and cataloged in the LMS/CMS portal
- Lectures database is available anywhere, anytime (24x7), immediately after class ends
- Tens of thousands of students are satisfied from thousands of recorded lectures
- Powerful viewer delivers a unique lecture participation experience with extraordinary rehearsal environment, empowering the learning cycle
