

Streamitup

**One Click Lecture Capture
Live and VOD platform**

Fully automatic

Capture Manage Share Interact

Content Centric VOD and LIVE Lecture Capture platform

Streamitup Content Centric Solution automatically extracts the relevant lecture content and represents it smartly to the end-users. Content is available anywhere, anytime, in a multifaceted way.

Our Content Centric approach is implemented as a fully-automatic solution

Streamitup overcomes the major obstacles of common lecture capture solutions such as the need for a video cameraman; or compromising by the use of static video capture (prohibiting the lecturer from moving); or, alternatively, using wide video angle (causing illegible 'whiteboard'). Common solutions also require expensive video editing and management, manual LMS and DB updates.

Seamless lecturer operation:

- Streamitup's automatic virtual cameraman controls the camera, which follows the lecturer, dynamically focusing on relevant content.
- Automatic capture of any lecturer's computer content (Office, Video, Application, Smart board etc.).
- Automatic synchronization between video camera, voice and lecturer's computer content.
- Lecturers continue working in their native environment, using their original methods and materials.
- Session may be recorded and run as a live event from the classroom, or even autonomously from the lecturer's PC.

The Lecturer manages live interactive sessions with remote classes.

Virtual Video Cameraman at your service

Streamitup's fully automatic 'Virtual Video Cameraman' takes care of all lecture capture Activities, making it seamless for the organization. No additional human resources are required.

Streamitup Content Centric approach provides learners and researchers with smart access to knowledge

- Robust platform for both V.O.D and LIVE sessions. Live and On-Demand access to classes.
- Digital channels created directly from lecture halls around the globe.
- Lectures database is available anywhere, anytime (24/7), during and immediately after sessions end.
- Powerful viewer delivers a unique feeling of real on-site lecture participation.
- Extraordinary in-depth rehearsal and research environment.
- Lectures are available on a diversity of browsers and devices.
- Hundreds of successful installations with hundreds of thousands of end-users.

The Content Centric platform has great added value for the Academic staff, Administration, IT personnel and Learner:

- Enterprise class Self-provisioned administration application, including central on-line monitoring of recorded and live sessions.
- Automatic upload and Metadata Database update.
- Installation-free viewer.
- Autonomous system with automatic, seamless integration to LMS/CMS.
- Single Sign-On (SSO).
- On Premises or full Cloud-based service.

One Click Lecture Capture Live and VOD platform

Streamitup

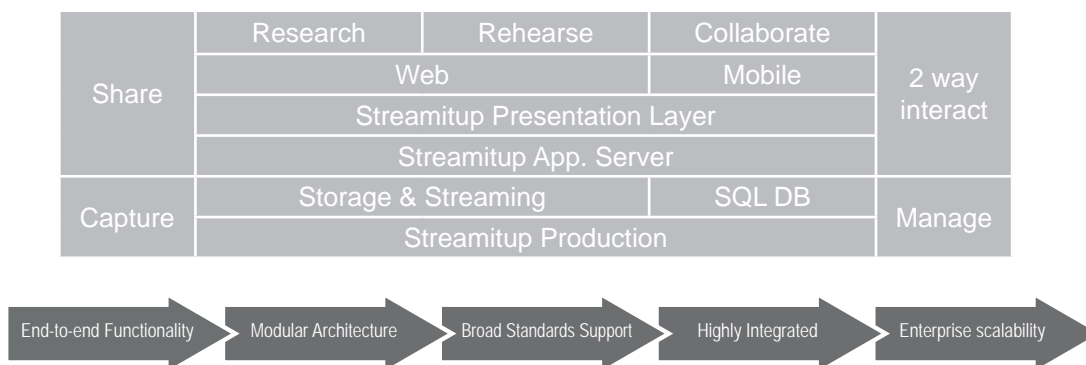

Streamitup Content Centric Solution for Live Lecture Capture

Streamitup platform enables lecture capture, online lessons, live video conference capabilities, video research etc. It may serve equally as VOD and LIVE session.

Our unique, fully-automatic Cloud-based solutions dynamically create and manage multimedia Knowledge databases. We cater to Synchronous and Asynchronous distribution along with powerful, in-depth review and research tools for end-users. Streamitup solutions are implemented at a variety of sites, including higher-education, government, defense forces, municipalities and corporations.

In a nut-shell

- Fully automatic (Patent Pending) solution: Automatic virtual video cameraman dynamically follows lecturer and focuses on relevant content at any point during the lecture.
- Automatic synchronization between video camera and lecturer's computer content (Office, Video, Application, Smartboard etc.).
- Transparent operation (Patent Pending) enables the lecturer to continue working in his/her natural environment using the original lecture methods and materials.
- Automatic upload and Database update.
- Learning and rehearsing from remote locations. Anywhere, Anytime (24/7), immediately after session ends.
- Live and On-Demand access to classes.
- Digital channels created directly from lecture halls around the globe.
- WEB & Mobile content availability with Multi-facet content accessibility (PC, mobile, LIVE, VOD, CD/DVD).
- Autonomous solution and LMS/CMS connectivity.
- State-of-the-art "Tool Box" including two synchronized videos for unique research, rehearsal and participation experience.
- Cloud-based solution enables activation in class, and autonomously on teacher's PC.
- Lectures database is available over the WEB.
- Enterprise class Self-provisioned administration application including central on-line monitoring of recorded and live sessions.

We provide enterprises, Educational Institutes, Government offices and Defense Forces, with live, automatic and priceless knowledge database-creation. No additional human resources required.
